What sets you apart from other professionals in your industry?

Our attention to detail and ability to create spaces that our clients feel comfortable living in. We feel that our homes shouldn't just be designed for special occasions, like some of us experienced as kids. (Remember the furniture covered in plastic?) Many clients come to us to recreate a space in a way that is beautiful without compromising function and daily living—and this is what sets us apart. We pay close attention to each client's individual style preferences and translate that into a beautiful and functional space.

Describe the scope of your (or your firm's) services.

We provide hands-on interior design, home staging and home organizing services. We can customize any project to meet a client's needs. Whether it's a home polish or a

complete re-design, we tailor our services for projects of any size or budget.

Describe your design aesthetic.

My design aesthetic is often dictated by the style in which the home was originally built. Our home (pictured above) is a French Normandy style home. We tried to maintain the integrity of the home's original style by creating a French inspired look with modern elements throughout. Ensuring this kind of consistency is an essential component of our design process and philosophy.

What designs are you known for?

Designs that balance classic and modern. Our design mantra is: a home should reflect the personalities, interests and lifestyles of the people who live in them!
