Kitchen – Before

If you're in search of a quick and hassle-free kitchen refresh, look no further. Adding bright white paint to your kitchen cabinets can transform and brighten the entire room, without breaking the bank. We talked to the design collective Rose Schneider, Megan Peykoff and Samantha Ball at Maison Rose Interiors who proved that this one simple change can really go far.

When Diane Magdaleno of Coto was ready to renovate her kitchen, a lot needed to be done. The layout, fixtures, dark cabinetry and old countertops made the space feel small, dark, and drab. Diane was ready to fully transform her kitchen space.

The result, a kitchen restored to a more simple, accessible and elegant aesthetic complete with crisp modern updates. Uniting clean white modernism with classical touches. The sleek island and white cabinets make this space equal parts spacious and chic. This space was accented with the traditional elements that speak to Diane's personal taste and style. "Understanding our clients' personal aesthetic and incorporating that into our design is what we love to do!" says the Maison Rose team.

To update the space, the Maison Rose team shares, "We replaced the dark brown cabinetry with white cabinets, which bounce natural light welcomed in by the home's large windows. We also tore out the islands, replaced and re-positioned them in a way that now serves as a place to easily move about in and entertain. We combined the kitchen and the living room to create a more open and cohesive space."

Rose Schneider and Diane Magdaleno

When commenting on her kitchen remodel, Diane shares; "We couldn't be happier working with Maison Rose Interiors. Rose's sense of style when it comes to updating a space on a budget really allowed us to move from initially starting in the kitchen to ending in the family room. We worked great deciding on all the options for our spaces. I loved that she was always available when we came across a few hiccups. She always had a plan B. She is a breath of freshness to any space – she's exactly what we needed here in Coto."

Contractor – Steve Jarman from Jarman Construction.
